

QUICK PIANO

**4 skills, each taught separately
until they are rapid-fire automatic**

USING QUICK MUSICAL SNAPSHOTS

**Then put them
together and
Presto . . . you can *play!***

Learn to play piano the easy way
with
QUICK PIANO

Quick Piano is a method that enables you to play real music as quickly as possible!

The key to this new technique is first **MASTERING EACH SKILL RAPID-FIRE BY ITSELF.**

Here's how it works...

- (1) Each skill is learned separately, without the confusion of trying to master the others at the same time.
- (2) Each skill is drilled by using powerful memory hooks until it becomes so fast it's automatic.

The result? Having mastered these tools, you'll be able to learn new pieces easily and quickly without having to *think* about the basics.

Rapid Notes - Sure Chords - Right Rhythm
Your fingers will know it so your mind can forget it.

If you like Zoom-Type, you'll LOVE Quick Piano

- Remember when you had to take piano lessons as a kid? Was it painful? tedious? Did you want to quit? ***Playing the piano should be fun!***
- With the Quick Piano fast chord method, it is possible to gain skill enough in one day to play simple songs.
- This self-paced piano system enables kids (and their parents) to play songs right away, romping up and down the entire keyboard with chords, giving them immediate emotional reward.
- Each of four piano-playing skills is mastered separately, using powerful memory hooks and musical tricks until it becomes automatic.
- Because the total task is splintered into these easy smaller skills, the brain is never overwhelmed.
- When the skills are finally put together, ***Presto!***, you can play.

Includes printed guide, practice keyboard pages, 27 simple songs with chords, and show-me-how audio CD. Same price as Zoom-Type.

"We are completely impressed with the Quick Piano program. Because my husband has some musical background he sat down and read through the whole course. Then he said, "I've been looking for this course all my life. When our son is through with this he'll be able to play ANYTHING with chords. This is the way piano should be taught in the 21st century." He wants to share Quick Piano with all our friends." *Blanche in Vail, Colorado*

"Renee, I bought your piano book at the recent CHAP convention, but I was only half convinced that your method would work. Well, my five-year-old jumped right in and memorized 12 chords in one afternoon. Thanks a million and keep up the good work!" *Mrs. Tan in Pittsburgh, Pennsylvania*

"Our daughter's self-esteem was plummeting when she began piano lessons the standard way. She would often say 'I just can't do this!' and felt like a failure. When she tried Quick Piano and was able to begin with a big sound instead of dull ditties, she took off." *Susan, mother of Hannah, age 9*

"In six months' time, my kids are playing piano, reading music, and LOVING IT MORE THAN SOCCER!" *Thea, mother of Hannah, age 6 and Adam, age 8*
